

NATHAN NORRIS

Jasper, Indiana | github.com/NathanWNorris

SUMMARY

AI Fellow with Handshake and independent game developer experienced in prompt development, AI response evaluation, and error identification. Over a year of hands-on work building 3D platformers and indie games in Godot, Unity, and Panda3D, with skills in Python, JavaScript, and data analysis.

EXPERIENCE

AI Fellow | Handshake

- Develop prompts to test AI responses and support model training and evaluation.
- Review AI-generated responses, identify mistakes, assess quality, and flag areas for improvement.

Independent Game Developer | Self-Employed

2025 - Present

Jasper, Indiana

- Create original 3D platformers and smaller indie projects from concept through playable builds; scope projects, set milestones, and manage an independent development workflow.
- Build gameplay systems, character controllers, and level layouts in Godot and Unity; prototype 3D environments and mechanics in Panda3D.
- Write and debug GDScript, C#, and Python gameplay code for movement, jumping, and collision, balancing performance with player feel.
- Playtest builds and iterate on level design and difficulty using direct player feedback.
- Created Sweep Shift, an AI-assisted browser cleaning game using JavaScript and Canvas.

SKILLS

AI evaluation: Prompt development, response evaluation, error identification

Programming: Python, JavaScript, GDScript, C#, HTML/CSS

Game development: Godot, Unity, Panda3D, Matter.js, Canvas, level design, gameplay systems, playtesting

Other: Data analysis fundamentals, asynchronous project management, technical writing

EDUCATION

High School Diploma
